

About WWSA

Worldwide Scaffold and Access Ltd (WWSA) is a global scaffolding consultancy and supply specialist, founded in 2017 by Tony and Karen Stevens. Built on over 50 years of hands-on industry experience, WWSA combines technical knowledge, trusted networks, and a passion for problem-solving to deliver scaffolding solutions that work in the real world.

What We Do

WWSA provides safe, cost-effective scaffolding and access solutions to clients worldwide. Our services include:

- **International supply** of new scaffolding systems
- **Brokering and resale** of quality pre-owned equipment
- **Design, calculations, and consultancy** to support complex projects
- **Training and technical support** to build skills and confidence on site

This full-service approach ensures that clients – from major contractors to smaller independents – receive the right solution for their needs, wherever they are.

Our Ethos

For WWSA, scaffolding is about more than just materials. It's about **relationships, reliability, and trust** – values that have shaped our work from day one. With a loyal, global client base and a reputation for personal service, WWSA is proud to support projects of every scale with the same attention to detail and care.

Community & Responsibility

WWSA is committed to giving back. We are proud supporters of the **Bone Cancer Research Trust**, raising awareness and funds for vital research. Closer to home, we also sponsor **King's Lynn Town Football Club** as official sleeve sponsor, reflecting our passion for supporting grassroots initiatives in the community where we live and work.

Our Vision

To be recognised as a trusted global partner for scaffolding consultancy and supply – combining international reach with personal service, and helping our clients deliver safer, smarter, and more sustainable projects.

ScaffCycle

In 2025, WWSA launched **ScaffCycle**, the UK's first dedicated marketplace for second-hand scaffolding – a platform designed to cut waste, free up yard space, and support the industry's shift toward a circular economy.
